PERSONAL PROFILE

Business and technology professional combining project delivery, operational experience, problem-solving and a growing technical skill set. Experienced in coordinating complex projects, leading teams and improving processes across different business environments. Developing practical knowledge across information systems, AI, automation, cloud and data, with a strong interest in using technology to solve business problems and improve how organisations work.

WORK EXPERIENCE

Founder and Developer | Nupcial ***Feb 2026 - Present***
Skills: Product Development | Full-Stack Development | AI-Assisted Development

- Designed, built and launched a live two-sided wedding planning SaaS platform, covering product concept, UX/UI and full-stack development using React, Vite, Zustand and Supabase, with Claude Code supporting AI-assisted development and debugging.
- Delivered core features including guest and seating management, budget tracking, vendor onboarding and a Stripe-based commission model, managing the product from initial prototype through to live deployment and ongoing development.

Higher Education and Professional Development ***Nov 2023 – Sep 2026***
Skills: Information Systems | Systems Modelling | Business Intelligence | Data Analytics

- Completed a BA (Hons) in Business Management, achieving First Class Honours.
- Completed an MSc in Information Systems Management at the University of Sheffield, developing knowledge across information systems, systems modelling, BPMN, Business Intelligence and digital business.
- Attained professional certifications in Data Analytics, PRINCE2 and Six Sigma.

Repack Supervisor | Brand Addition ***Sep 2018 - Nov 2023***
Skills: Project Coordination | Team Leadership | ERP Systems | Process Improvement

- Organised and coordinated up to 300 international repack and logistic projects each year for clients worldwide, keeping track of the project schedule and ensuring delivery within set deadlines and quality requirements.
- Operated an internally developed ERP system daily, managing order processing, stock control, client management, warehouse operations, and project tracking across one integrated platform.
- Managed cross-site project teams comprising 20 employees working in different locations in the United Kingdom and Germany, optimising resource allocation and managing scheduling conflicts, and ensuring constant communication within the project process.
- Created KPI dashboards using Excel, applying advanced functions like Pivot Tables and variance analysis to monitor departmental operations, resulting in a 45% increase in resource allocation efficiency due to regularly produced reports.

QUALIFICATIONS

PRINCE2 Foundation
PeopleCert | 2024
Six Sigma Yellow Belt

Full UK driving licence - Own vehicle

REFERENCES

References are available upon request.

- Validated courier batch data imports into the system using ETL processes, performing inventory reconciliations to identify discrepancies and minimise dispatch errors across the supply chain.
- Authored the department's first official workflow document, outlining standardised processes to reduce employee training duration and improve efficiency.

Aircraft Cargo Operator | CateringPor - Lisbon **Mar 2015 - Mar 2018**
Skills: Logistics Coordination | Compliance | Time Management | Operational Planning

- Oversaw cargo handling and ground operations for airlines, including TAP, Air Canada, and Emirates, managing 200 daily flights.
- Met all deadlines for completion of operational duties while ensuring strict compliance with safety, security and documentation regulations required by each airline.
- Coordinated logistics in high-pressure situations due to limited time windows between flights.

Private Security Officer | Esegur - Lisbon **Jan 2014 - Jan 2015**
Skills: Record Management | Incident Reporting | Compliance | Attention to Detail

- Recorded and monitored all incoming and outgoing personnel at the premises, maintaining accurate and up-to-date security logs and incident reports.
- Monitored live CCTV and acted on any threat that was identified, maintaining a safe working environment.
- Performed security patrol rounds, identifying and reporting any issues in adherence to the company's safety regulations.

Private Security Officer | Prosegur - Lisbon **Jul 2012 - Nov 2013**
Skills: Operations Oversight | Risk Assessment | Compliance | Record Management

- Managed gate access control operations, verifying and recording entries of 400 employees and guests and maintaining security records on duty.
- Patrolled the business premises on a regular basis, documenting incidents through official reports.
- Conducted regular risk assessments of operations within the site to ensure conformity with safety regulations.
