## PROFESSIONAL PROFILE

Business and technology professional with a background in coordinating international operations. Experienced in analysing business processes, defining requirements and designing practical solutions, from operational tools and workflow standards to software products and automation. Interested in using data, AI and technology to solve real business problems and improve how organisations work.

## CORE COMPETENCIES

- **Delivery & Analysis:** Project Delivery, Business & Systems Analysis, Requirements Analysis, Data Analysis
- **Process & Systems:** Process Improvement, Information Systems, AI & Automation Concepts
- **Leadership:** Stakeholder Management, Team Leadership, Problem Solving

## TECHNICAL SKILLS

- **Data & BI:** Power BI, Excel, SQL, Python
- **Development:** React, Vite, Supabase, Flask, SQLite, Stripe Connect, Claude Code, Generative AI
- **Version Control & Quality:** Git, GitHub, pytest, ruff, mypy
- **Modelling & Diagramming:** BPMN, Process Modelling, Data Flow Diagrams, Lucidchart, draw.io
- **Project & Productivity:** MS Project, Trello, Miro, Slack, ClickUp, Microsoft 365

## WORK EXPERIENCE

**Team Lead | AI Deployment Sprint** Oct 2026 - Present

*Skills: Solution Design | Business Analysis | Python | Flask | Requirements | Stakeholder Management*

- Led an eight-week, Innovate UK-funded sprint for a UK manufacturer, delivered by Manchester Digital and Manchester Metropolitan University, managing planning, risks and client communication.
- Mapped and timed the current process in BPMN, then analysed 130 CAD and production files in Python to document and validate over 40 design rules with the client.
- Conducted the business analysis, including root cause analysis, MoSCoW-prioritised requirements, acceptance criteria and an options appraisal.
- Built a rules-based MVP in Python, Flask and SQLite by directing Claude Code against a written specification, with automated quality gates and code review before every merge, cutting standard order preparation by over 99%, from about 25 minutes to 12 seconds; the client selected it as its chosen solution.
- Produced user, maintenance and troubleshooting guides to support handover to the client.

**Founder and Developer | Nupcial** Feb 2026 - Present

*Skills: Product Development | Full-Stack Development | API Integration | AI-Assisted Development*

- Designed, built and launched a live two-sided wedding planning platform for couples and vendors, covering guests, seating, budgets and vendor bookings.
- Developed it with React, Vite and Supabase, applying row-level security so each couple can only access their own data, with Claude Code for AI-assisted development and Git for version control.
- Implemented a Stripe Connect commission model for vendor payments and generative AI features to support couples with planning.

**Higher Education and Professional Development** Nov 2023 - Sep 2026

*Skills: Information Systems | Systems Modelling | Business Intelligence | Data Analytics*

- Completed an MSc in Information Systems Management with a Distinction and the School prize for the highest weighted mean grade, serving as Academic Representative and featured in the University's student profiles.
- Completed a BA (Hons) in Business Management with First Class Honours, serving as Student Representative for all four years.
- Developed data analysis skills in Excel, Power BI and SQL through the NCFE Level 3 Certificate in Data, with projects published on GitHub.

- Worked as a freelance virtual assistant alongside studies, supporting clients with Self Assessment tax returns and government applications.

**Repack Supervisor | Brand Addition** Sep 2018 - Nov 2023

*Skills: Project Coordination | Team Leadership | ERP Systems | Process Improvement*

- Supervised the repack department end to end, from client request to dispatch, delivering over 400 projects a year for UK and international clients, and acted as the department's first aider.
- Led and trained the team across the Manchester and Gelsenkirchen sites, supervising the production line to quality standards.
- Designed the department's Excel scheduling, costing and KPI tracker (Pivot Tables, variance analysis) to keep projects to deadline and budget, reporting to management.
- Managed orders and stock in the internal ERP system and produced customs declarations and commercial invoices, including for dangerous goods (CAA-approved lithium battery training).
- Authored the department's first official workflow guide, documenting the end-to-end process and simplifying onboarding for new staff.

**Aircraft Cargo Operator | CateringPor - Lisbon** Mar 2015 - Mar 2018

*Skills: Logistics Coordination | Compliance | Time Management | Operational Planning*

- Loaded cargo and onboard catering supplies for airlines including TAP, Air Canada and Emirates, across 200 daily flights.
- Met tight turnaround windows between flights while complying with each airline's safety, security and documentation rules.

**Private Security Officer | Esegur - Lisbon** Jan 2014 - Jan 2015

*Skills: Record Management | Incident Reporting | Compliance | Attention to Detail*

- Monitored personnel access, live CCTV and patrol rounds, maintaining accurate security logs and incident reports.

**Private Security Officer | Prosegur - Lisbon** Jul 2012 - Nov 2013

*Skills: Access Control | Risk Assessment | Compliance | Record Management*

- Managed access control for a site of 400 employees and guests, keeping security records and conducting regular risk assessments.

## EDUCATION

**MSc Information Systems Management - Distinction** 2025 - 2026
*The University of Sheffield*

**BA (Hons) Business Management - First Class Honours** 2021 - 2025
*London Metropolitan University*

**NCFE Level 3 Certificate in Data** 2025
*NCFE*

## CERTIFICATIONS

**PRINCE2 Foundation** 2024
*PeopleCert*

**Lean Six Sigma Yellow Belt** 2024
*AIGPE*
